

I wish once and for all big business would stop interfering in small business preferences. If verizon, fcc or anyone insists upon taking my dial up network away taking my right of choice I will join any petition to fight this unwanted change. I use Berkshire net by choice. Leave the country people alone who are quite capable of their own choices. There are other carriers and there are other choices without stuffing 2 only choices down our throats. I chose a dial up network, I chose antenna over cable and I resent people trying to reach into my wallet and take more of my hard earned cash, never mind getting involved in my small business/home office. Even if this service was free I would not subscribe to it. Big business, leave us alone. Patricia Ann Burnham d/b/a PAT Realty
